

Wouldn't you like to open up your rooms and create spaces that are lighter, brighter and more inviting? Until now, homeowners have had little choice when it came to fitting flexible internal doors in the home. There were the old bi-fold doors of course. But these have huge gaps at the top, bottom and sides and no weather seals to stop draughts. You could also have sliding, folding doors manufactured as a bespoke product but this was extremely expensive.

With our new range of sliding, folding internal doors, everything has changed. For the first time ever, homeowners can buy and fit expanding and versatile internal doors without paying the earth. In fact, our high quality folding door system combines the detail and workmanship of tailor-made sliding doors, but at off-the-shelf prices.

Our sliding, folding doors are crafted in a specialist, state-of-the-art woodworking factory using the latest hi-tech machinery to maintain a high and consistent standard. And because we produce such large numbers, we can keep prices down to an affordable level.

Vufold sliding, folding internal door sets are guaranteed for ten years against the occurrence of manufacturing faults. Our customer promise means that if anything is found to be faulty on delivery, we will exchange it without question. This guarantee is subject to our terms and conditions, care and maintenance instructions, and our homeowners' manual being followed and complied with. Full details can be found on our website or by request.

Slide bolts are included to keep the doors closed and in line

Our internal doors are the first in the UK with completely pre-machined frames and doors for easy assembly

Each set includes one or two daily access doors

VUFOLD®

Why choose Vufold?

Our internal doors are based on our highly successful and extremely popular external door sets. Providing a unique combination of quality, design, technology and affordability, our sliding, folding external doors took the market by storm.

Of course it's been copied, but Vufold will always be the original and the best. In fact, no other product available today offers all of these features and benefits in one simple sliding, folding door set. And now we're offering you these same unique product benefits in a stylish, high quality internal door collection.

A unique combination of benefits

Our customers tell us that our unique folding, sliding door system is simply the best. Guaranteed for ten years – see our full guarantee overleaf – our internal doors are available in three, four, five and six door sets.

We have three styles of door – 1 lite, contemporary 3 lite and a 4 lite option, and two sizes of door. The Slimline models incorporate 610mm wide doors (2' wide) and the Widefit models have 743mm or 686mm wide doors (approx 2' 5" or 2' 3").

The 35mm thick doors are solidly made with a genuine oak veneer on a solid wood engineered core for greater stability.

Daily access doors

Our internal doors incorporate one or two daily access doors. This means that you don't have to fold the whole set open each time you want to go between rooms. The oak doors are supplied unfinished in natural oak, and the frame is in white primer. So everything is ready for the final finishing coats to be applied at home to match your colour scheme.

Special seals keep the draughts out

Your flooring butts up neatly to the oak cill, which has a special aluminium sub cill for easy fitting and extra strength

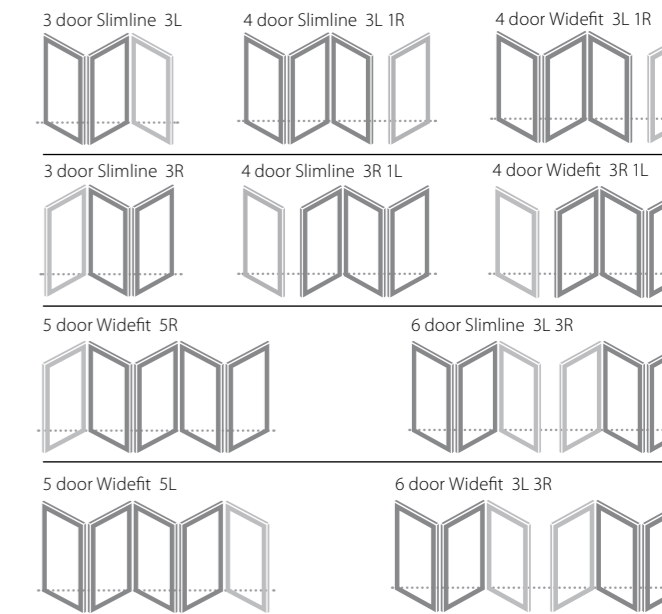

Configurations

The sets can be fitted to open into or out from the room of your choice, and opening from left to right or from right to left.

Unfinished oak

NB. Doors can be locked from either side.

Easy to fit

Each set includes doors, frame, cill, tracks and easy-to-follow fitting and assembly instructions. We also include high quality aluminium sliding, folding hardware, slide bolts and draught-proof seals. The only things we don't include are handles or architrave, as you'll most likely want to match the ones you already have elsewhere at home.

We offer incredible customer service too. All sets are normally in stock, so you can be enjoying your new doors within a couple of weeks.

Matching single doors available

Our internal door sets have one, three or four glass panels. We also offer single internal doors with one, three or four glass panels to match. And these come in three different widths.

Size Guide

No of doors	Outer frame width	Door configuration
3 door- Slimline	1904mm	3L or 3R
4 door- Slimline	2518mm	3L1R or 3R1L
4 door- Widefit	3050mm	3L1R or 3R1L
5 door- Widefit	3797mm	5L or 5R
6 door- Slimline	3746mm	3L3R
6 door- Widefit	4202mm	3L3R

All sets are 2074mm high, outer frame dimension. All doors are 1981mm high. The Slimline models incorporate 610mm wide doors (2') and the Widefit models have 743mm wide doors (2' 5"), except for the 6 door model which has 686mm wide doors (2' 3").

Each door is 35mm deep (1 3/8") and the frames come in two widths, 108mm or 133mm.
