

a room with a view...

Vufold sliding, folding door sets are guaranteed for ten years against the occurrence of manufacturing faults apart from the glass units, which are guaranteed for a five year period. All components are solidly made with genuine oak or hardwood surfaces on a solid hardwood core for stability. Our customer promise means that if anything is found to be faulty on delivery, we will exchange it without question. This guarantee is subject to our terms and conditions, care and maintenance instructions, and our homeowners' manual being followed and complied with. Full details can be found on our website or by request.

The mark of responsible forestry

Wouldn't you like to create a room with a view? Let more light in and bring your exterior and interior spaces closer together? Before Vufold, homeowners had little choice when it came to combining home and garden in one living area. There were sliding patio doors and traditional hinged French doors of course. And you could have sliding, folding doors manufactured as a bespoke product but this was extremely expensive.

When we introduced Vufold sliding, folding doors in 2005, everything changed. For the first time ever, homeowners could buy and fit expanding, versatile and highly secure external doors without paying the earth. In fact, our high quality folding door system combines the detail and workmanship of tailor-made sliding doors, but at off-the-shelf prices.

Our sliding, folding doors are crafted in a specialist, state-of-the-art woodworking factory using the latest hi-tech machinery to maintain a high and consistent standard. And because we produce such large numbers, we can keep prices down to an affordable level.

The top hung roller system gives an effortlessly smooth gliding action for easy folding

Top quality stainless steel sliding folding hardware pre-machined for easy assembly and installation

All sets have single or double daily access doors, so you don't have to open out all of the doors every time

The three-point locking system has two hook bolts for added security, and the doors can be locked from both inside or out

All sets have sliding bolts at the top and lockable sliding bolts at the bottom for extra security

A unique Vufold design feature – the combined oak top cill and aluminium sub cill allow water to drain away without going through the wood

VUFOLD®

Why choose Vufold?

In short, Vufold revolutionised external patio doors. Providing a unique combination of quality, design, technology and affordability, our sliding, folding doors took the market by storm.

Of course it's been copied, but Vufold will always be the original and the best. In fact, no other product available today offers all of these features and benefits in one simple sliding, folding door set.

A unique combination of benefits

Vufold is a unique folding, sliding door system and our customers tell us it's simply the best. Guaranteed for ten years – see our full guarantee overleaf – the range comes in six widths and two timber species: genuine oak or hardwood, with factory-applied three coat protection so that you can fit it straight away without any further finishing. The oak is also available unfinished if you want to apply your own finish and match your present colour scheme.

Each set includes doors, frame, cill, folding hardware, tracks, locks, handles, frame fixings, lintel fixings and easy-to-follow fitting and assembly instructions.

What's more, virtually everything is pre-engineered making the doors simple to fit and adjust up or down, left or right with a simple screwdriver action. And no other company also supplies you with special drill bits to make fitting easier.

Reversible left or right folding door opening is available from the same set – you don't have to specify when you order. And all sets also have single or double daily access doors, so you can go in and out without having to fully open the set each time. In addition, all of our doors open outwards, so they don't take up any space in your room and maximise your living area.

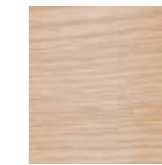

Weather out. Heat in.

Vufold sliding, folding door sets are designed to keep the weather out and your heat in. Each set has 24mm double glazed sealed units, using thermally efficient Low E glass and toughened safety glass tested in accordance with British Standards, BSEN 12150 IC2 and BSEN 12600.

They're weather tested to BS6375 Part 1 and include double weather seals to keep draughts out. Extra thick 54mm doors give greater stability and additional insulation too. All sets are document L compliant which means that they're tested to ensure thermal efficiency and lower carbon emissions from the home, achieving a test rating of 1.9 W/m²K. Naturally, we only use timber certified by the Forest Stewardship Council®.

We offer incredible customer service too. All sets are normally in stock, so you can be enjoying your new doors within a couple of weeks.
